

Table of Contents

1 Seventh Grade

1.1 Pure Substances Are Rarely Found in Nature

1.1.1 Some Methods of Physically Separating Substances

- 1.1.1.1 Where Did the Salt Go?
Separation by Solution I
- 1.1.1.2 Why Fish Can Breathe
Separation by Solution II - Air in Water
- 1.1.1.3 On the Gold Diggers' Trail
Decantation
- 1.1.1.4 Salt from Blood and Claws
Evaporation
- 1.1.1.5 Your Own Sewage Treatment Plant
Filtering - Water Purification
- 1.1.1.6 A Miraculous Method of Bleaching
Distillation
- 1.1.1.7 Like a Gem
Crystallization
- 1.1.1.8 Who is Who?
Difference between Mixtures and Compounds

1.1.2 Dissolving Bonds by Chemical Reaction

- 1.1.2.1 Carbon from Sugar
How Sugar Carbonizes
- 1.1.2.2 The Effervescent Powder Factory
Releasing Carbon Dioxide

1.1.3 Chemical Elements Can be Derived from Compounds

- 1.1.3.1 Black from White
Extracting Carbon
- 1.1.3.2 The Golden Nail
Copper from a Copper Sulfate Solution
- 1.1.3.3 The Reflector Tube
Extracting Silver by Reduction

1.2 Electrical Conduction and Insulators

1.2.1 Conductivity of Different Materials

- 1.2.1.1 When Does the Light Bulb Burn?
Electrical Conductivity of Solid Materials
- 1.2.1.2 Following in Ritter's Footsteps
Electrical Conductivity of Fluids

1.2.2 Bonding of Ions (Ion Lattice, Ion Movement)

- 1.2.2.1 It Doesn't Dissolve!
Solubility of Salts in Water - Dependent on Temperature
- 1.2.2.2 Remarkably Unremarkable
Extracting Salt - Copper Sulfate
- 1.2.2.3 Color Comes with Water
Crystallized Water
- 1.2.2.4 Like a Hygrometer
Crystallized Water - Cobalt Chloride
- 1.2.2.5 The Wanderers
Ions Move at Different Speeds

1.3 Deriving New Substances by Electrical Current

1.3.1 Electrolysis of a Salt Solution

1.3.1.1 Brown Stripes

Electrolysis of a Zinc Oxide Solution

1.3.1.2 The Reverse

Electrolysis of a Copper Sulfate Solution

1.3.1.3 Exchanging Electrodes

Electrolysis of a Sodium Sulfate Solution

1.3.2. Technical Significance of Electrolysis

1.3.2.1 Signs of Decay

Electrolytic Refinement of Copper

1.3.2.2 The Decorative Key

Copper Plating a Key

2 Eighth Grade

2.1 Chemistry: The World of Substances

2.1.1 Changing the Characteristics of Substances - Typical Features of Reactions

2.1.1.1 Two Color Printing

Color

2.1.1.2 Gas Is Free

Development of Gases

2.1.1.3 The Red Flame of Alcohol

Light, Heat, Color

2.1.1.4 But, But ...

Smell

2.1.2 Difference between Physical and Chemical Characteristics and Phenomena

2.1.2.1 Sweet and Smoky

Sugar - Physically and Chemically

2.1.2.2 Violet-Blue Smoke and the Cure for Goiter

Iodine - Physically and Chemically

2.2 Water Seen Chemically

2.2.1 Composition of Water

2.2.1.1 The Water Maker

Reduction of Water

2.2.2 Reaction of Water and Oxygen

2.2.2.1 Oxyhydrogen

Test for Oxyhydrogen

2.2.3 Different Characteristics of Water Compounds with Hydrogen and Oxygen

2.2.3.1 Why an Iceberg Floats

Expansion of Water while Freezing

2.2.3.2 The Red Geyser

Density of Water

2.2.3.3 Burning Foam

Combustion of Hydrogen

2.2.3.4 The Splint Test

Extracting Oxygen - Testing for Oxygen

2.2.4 Water as a Pure Substance and a Solvent

2.2.4.1 Almost Invisible

Solids in Water

- 2.2.4.2 Similar Things Dissolve in Each Other
Fluids in Water
- 2.2.4.3 Gasoline Spill
Water Pollution by Gasoline - Water Purification

2.2.5 Oxidation and Reduction

- 2.2.5.1 The Magic Straw
Iron Rusts
- 2.2.5.2 Exploding Dust
Rapid Combustion
- 2.2.5.3 Charcoal is Very Active
Reduction

2.2.6 Energy in Reactions (Exothermic and Endothermic Reactions)

- 2.2.6.1 It Depends on Heat
Endothermic Phenomenon
- 2.2.6.2 Pocket Warmer
Exothermic Phenomenon

2.3 Chemicals in Daily Life - It All Depends on the Dosage

2.3.1 Dosage - Concentration

- 2.3.1.1 Looking for PPM
Series of Dilutions - Potassium Permanganate

2.3.2 Using Household Chemicals

- 2.3.2.1 Clean as a Whistle
Ammonium Chloride in Household Cleaners

2.3.3 Using Flammables and Solvents - Preventing Fires

- 2.3.3.1 Starving
Removing the Flammable Substance
- 2.3.3.2 Cold Shock
Cooling Below Combustion Temperature
- 2.3.3.3 Never with Water
Removing Oxygen
- 2.3.3.4 Beware of High Pressure
How a Fire Extinguisher Works

2.4 Acids and Bases in Daily Life

2.4.1 Testing for Acidic and Basic Substances in Water Solutions Using Indicators

- 2.4.1.1 Kitchen Chemistry
Testing for Acids and Bases Using Indicators

2.4.2 Measuring pH Levels

- 2.4.2.1 Almost Homeopathy
Changing pH Values by Dilution

2.4.3 Electrical Conductivity of Acids and Bases

- 2.4.3.1 Acidic Conductors?
Testing the Electrical Conductivity of Acids
- 2.4.3.2 Basic Conductors?
Testing the Electrical Conductivity of Bases

2.4.4 Hydrochloric, Sulfuric, Nitric and Acetic Acid

- 2.4.4.1 Wait Until It Gets Dark
Testing for Hydrochloric Acid
- 2.4.4.2 The Thirsty Gas
Hydrogen Chloride Is Hydroscopic

2.4.4.3 Not Only for X-Rays

Testing for Sulfation

2.4.4.4 Aqua Fortis

Nitric Acid - Metals - Metallic Oxides

2.4.4.5 Copper's Enemy

How Patina Develops

2.4.5 Sodium Solution, Dissolved Calcium, Ammonia

2.4.5.1 A Slippery Affair

Sodium Solution is Soapy and Basic

2.4.5.2 Beware of the Chalk Pit

Slaking Calcium by Raising the Temperature - Basic Reaction

2.4.5.3 November Fog

Extracting Ammonium Chloride

2.4.6 Neutralization

2.4.6.1 The Gypsum Factory

Neutralization

2.5 Air: the Life Element

2.5.1 Composition of Air (Nitrogen, Oxygen)

2.5.1.1 Beware: Shortage of Air!

No Combustion Without Oxygen

2.5.1.2 Air Mofette

Extracting Nitrogen

2.5.2 Combustion - Flames - Breathing

2.5.2.1 The Glowing Spot

Soot - Burning Soot

2.5.2.2 Fiery Games

Experiments with Candle and Burner Flames

2.5.2.3 Take Your Breath Away

Testing for Carbon Dioxide in Exhaled Air

2.5.3 Oxides Are Produced by Elements Reacting with Oxygen

2.5.3.1 White Hot

Behavior of Sheet Metals When Heated

2.5.3.2 What the Romans Drank From

Reduction of Lead Oxide

2.5.4 Air Pollution Resulting from Combustion

(Carbon Dioxide, Sulfur Dioxide, Nitrogen Dioxide)

2.5.4.1 The Burned-out Splint

Extracting Carbon Dioxide - Extinguishing

2.5.4.2 Who Swallowed the Gas?

Solubility of Carbon Dioxide in Water

2.5.4.3 Also Works against Smoke Stack Fires

Characteristics of Sulfur Dioxide

2.5.4.4 The Gas Mask

Adsorption of Sulfur Dioxide by Activated Charcoal

2.5.5 Other Pollutants (Dust)

2.5.5.1 Only Flies are Kept Out

Air Pollution due to Dust

2.6 Natural Substances and Synthetic Products

2.6.1 The Elements Sodium and Chloride (Alkali Compounds, Halogen Compounds)

2.6.1.1 Preparatory Chemistry

Making Sodium Thiosulfate

2.6.1.2 Photo Laboratory

Sodium Thiosulfate as a Fixing Salt

2.6.1.3 The Bacteria Killer

Extracting Chlorine - Characteristics

2.6.2 Comparison of Table Salt as a Natural Substance and a Synthetic Product

2.6.2.1 Nature versus Synthesis

Experiments with Sodium Chloride - Natural and Synthetic Substance

2.6.3 Table Salt (Sodium Chloride) - Some Characteristics

2.6.3.1 Everything Stays the Same

Solution and Recrystallization of Sodium Chloride

2.6.3.2 Learning from Nature

Experimental Model of a Salt Bed

2.6.4 Electrolysis of Table Salt

2.6.4.1 Poor Table Salt

Electrolysis of a Table Salt Solution

2.7 Substances in the Working World

2.7.1 Iron

2.7.1.1 Colorful Palette

Hardening and Tempering Steel: Annealing Color

2.7.1.2 Cars Rust Quickly in Winter

Accelerating Rusting with Sodium Chloride

2.7.2 Aluminum

2.7.2.1 A Burning Metal

Effect of Oxygen in Air on Aluminum

2.7.2.2 Colored Sheeting

Anodizing and Coloring Aluminum

2.7.3 Fertilizer

2.7.3.1 Kastner's Idea

Testing for Mineral Substances in Wood Ash

2.7.4 Mineral Building Materials

2.7.4.1 Degassed Rock

Lime Burning - Mass Reduction

2.7.4.2 Plaster - Finger

Making a Plaster Cast

2.7.4.3 A Hard Test

Hardening Mortar by Absorption of Water

2.7.4.4 Brickyard

Firing Clay Bricks - Characteristics

2.7.5 Carbon

2.7.5.1 A Small Coking Plant

Composition of Bituminous and Ligneous Coal

2.7.6 Natural Gas and Petroleum Products

2.7.6.1 Gas from the Earth's Crust

Composition of Natural Gas

2.7.6.2 About 150 Hydrocarbons

Characteristics of Gasoline

- 2.7.6.3 Winter Oil
 - A Lubricant's Viscosity Depends on the Temperature

2.7.7 Some Hydrocarbons

- 2.7.7.1 A Sniffing Substance
 - Dissolving Grease with Bexane
- 2.7.7.2 The Three-Armed "Ene"
 - The Unsaturated Carbon Acetylene
- 2.7.7.3 When Does Candle Wax Melt?
 - The Melting of Paraffin

2.8 Chemistry - Natural and Industrial Synthetics

2.8.1 Photosynthesis

- 2.8.1.1 Natural Colors
 - Chromatography - Chlorophyll
- 2.8.1.2 The Little Cell
 - Testing for Cellulose in Different Kinds of Paper and in Cotton Batten

2.8.2 Wood, cellulose

- 2.8.2.1 The Poor Charcoal Burner
 - Dry Distillation from Wood
- 2.8.2.2 Lignin
 - Testing for Lignin

2.8.3 Natural and Synthetic Fibers

- 2.8.3.1 What is the Sweater Made of?
 - Testing the Inflammability of Different Fibers

2.8.4 Plastics

- 2.8.4.1 Sorting
 - Sorting out PE, PS and PVC
- 2.8.4.2 Only Half as Heavy as Aluminum
 - Experiment with Polyvinyl Chloride

2.8.5 Caoutchouc, Rubber

- 2.8.5.1 Goodyear's Discovery
 - Testing for Sulfur in Rubber

2.9 Alcohol and Carbonic Acids

2.9.1 Ethanol and Alcoholic Fermentation

- 2.9.1.1 High Spirits
 - Characteristics of Ethanol
- 2.9.1.2 Alcotest
 - Testing for Alcohol in Wine
- 2.9.1.3 A Speedy Must
 - Alcoholic Fermentation Using Yeast

2.9.2 Comparing Bases and Alcohol

- 2.9.2.1 Almost a Base
 - Comparing Ethanol and Sodium Solution with an Indicator
- 2.9.2.2 Only One Conductor
 - Comparing the Conductivity of Ethanol and Sodium Solution

2.9.3 Other Alcohols

- 2.9.3.1 The Other Alcohol
 - Differentiating Simple and Polyvalent Alcohols

2.9.4 Acetic Fermentation, Acetic Acid

2.9.4.1 Sour Beer

Vinegar from Ethanol

2.9.4.2 Which Acid Is It?

Testing for Acetic Acid

2.9.5 Carbonic Acids

2.9.5.1 The Sourmaker

Testing for Lactic Acid in Sour Milk

2.9.6 Ester Formation

2.9.6.1 Mentha Piperita

Testing for Benzoic Acid - Ethyl Benzoate

2.10 Foods - Nutrients

2.10.1.1 What Removes the Spot?

Solubility of Oil in Different Fluids

2.10.1.2 The Grease Spot

Extracting Grease

2.10.2 Carbohydrates

2.10.2.1 What Are the Diet Killers Made of?

Chemical Composition of Glucose, Saccharose and Starch

2.10.2.2 Raisin Juice

Testing for Dextrose or Monosaccharides

2.10.2.3 Kitchen Duty

Testing for Rice and Potato Starch

2.10.2.4 Spittoon

Separating Starch and Glucose by Amylase with Saliva

2.10.3 Proteins

2.10.3.1 Proteins for Vegetarians

Testing for Proteins in Foods

2.10.3.2 White - Red - Black

Testing for Nitrogen and Sulfur in Protein

2.10.3.3 Fever!

Denaturing Protein with Heat

2.10.4 Vitamins

2.10.4.1 The Anti-Scurvy Vitamin

Vitamin C Test with Methylene Blue

2.10.5 Minerals

2.10.5.1 Petit-lait

Making Whey - Testing for Phosphate, Chloride, Sodium and Potassium

2.10.6 Conserving Foods

2.10.6.1 Cold Shock

Deep Freezing Foods

2.10.6.2 Ingredient for a Cereal

Conserving by Drying

2.11 Substances for Cleaning and Hygiene

2.11.1 Detergents

2.11.1.1 The Retreat

Making Visible and Reducing the Surface Tension of Water

2.11.1.2 Dishwater

Detergent as a Dirt Trap

2.11.2 Hard and Soft Water

- 2.11.2.1 How Hard Is Water?
Testing for Calcium in Different Water Samples

2.11.3 Soaps

- 2.11.3.1 Soapmaker
Making Soap

2.11.4 Spot Remover

- 2.11.4.1 The Spot Remover
Removing Spots with Benzine
